

# Containers for Paints & Coatings

This family of cylindrical containers is ideal if you are looking to enhance your brands sustainability credentials. They cover all the key product fills from 125ml sample pots up to 5 litres, they are light weight, easy to open and reclose and maintain high product quality. As they are made from steel they can be recycled infinitely and are well placed in terms of upcoming packaging legislation.

If you are reviewing your Brands packaging and looking for a sustainable alternative please enquire for more details.

## Materials Matter

Plastic has become pervasive in paints packaging, but it has a serious image problem with consumers.

Study conducted by the Boston Consulting Group (n=5,153)

# 83%

of consumers among younger generations showed a willingness to pay more for sustainable packaging

# 73%

of consumers are willing to pay more for eco- friendly packaging

# 80%

Up to 80% of all metal ever produced in the world is still available for use
